# 1 About filtering

Filters can be used to search for files or folders that will be included or excluded in the backup. The user can specify criteria that will be used to filter out files/folders.

Some key points to understand before reading this guide:

- AhsayOBM and AhsayACB filters checks the whole filename including the filename extension. For example, you have a document with filename 'employees' so if ends with s is your filter then this file will not be included in the backup since its whole filename is 'employees.doc' or 'employees.docx' with both files not ending in s but c and x respectively. Your OS may, by default, hide file extensions. For further reference regarding showing file extensions, please refer to the following websites: <http://kb.winzip.com/kb/entry/26/> or <https://www.thewindowsclub.com/show-file-extensions-in-windows>.
- This document may make references to regular expression patterns. Regular expression patterns are case-sensitive. For example, your pattern to match is '^a.\*\.xls\$', will only match filenames starting with lower case letter a, but not filenames with upper case letter A. For further reference regarding regular expressions please refer to the following websites: <https://docs.microsoft.com/en-us/dotnet/standard/base-types/regular-expression-language-quick-reference>, <https://medium.com/factory-mind/regex-tutorial-a-simple-cheatsheet-by-examples-649dc1c3f285>, [http://nebc.nerc.ac.uk/courses/perl\\_bioperl/regex.pdf](http://nebc.nerc.ac.uk/courses/perl_bioperl/regex.pdf), and <http://www.cbs.dtu.dk/courses/27610/regular-expressions-cheat-sheet-v2.pdf>
- This guide will assume you do not have any preempted values which may hide or disable certain features. If you encounter your UI does not exactly match the screenshots in the guide, this may explain the discrepancy. You may need to contact your AhsayCBS system administrator for consultation.
- Please note that inclusion or exclusion made by filter takes precedence over backup source selection.

## What are the requirements?

In order to create a backup set with filter, requirements are essential to avoid any interruptions upon running the backup set.

- **Network connection**  
You need to have a network connection for backup sets with filters that has Windows shared folder as source destination. This is applicable for Windows OS and Linux / FreeBSD OS.
- **Account rights**  
On Windows OS, for running AhsayOBM (GUI) / AhsayACB. you need to have administrator rights to allow you to view files on the server and for running AhsayOBM (CLI). This will allow you to check if the filter criteria are correct. While on Linux/ FreeBSD OS you need to login as root to access the AhsayOBM – GUI and CLI.

## What are the limitations?

There are limitations in creating a backup set with filters on various Operating System. Below are some of the limitations of Linux / FreeBSD OS:

### Linux / FreeBSD OS

- Creation of backup set with filters is not supported using backupSet.xml.
- Creation of backup set with filters that has simple comparison as pattern is not supported using backupSet.xml.
- Creation of backup set with filters that has regular expression UNIX-style as pattern is not supported using backupSet.xml.
- Creation of backup set with filters in continuous backup is not supported. As continuous backup is only supported on Windows OS.
- Preview is available on Linux/ FreeBSD OS if AhsayOBM is running in GUI environment. You can still check the result of your backup set with filters by checking the report and log. Refer to [Ch. 5.3 Verify the backup report and logs](#).

## What are the recommendations?

Here are some recommendations to make the backup set with filter more efficient and to maximize the full potential of the said feature.

- When creating a backup set with filters, make sure that the filters you set does not conflict with each other.
- Filters will be applied in creation order.
- When creating a backup set with filters, make sure to fill up the Deselected Source field.

For Linux/ FreeBSD OS, ensure that these paths have been added:

- **/root/.obm**
- **/usr/local/obm**
- **/root/temp**

### Notes:

- The **/root/temp** is just a sample for reference purposes only. This will depend on your actual temporary folder path.
- These are also the non-regular files/folders such as device files, block files, virtual files systems, pseudo file systems, etc. will be automatically ignored if selected for backup. Backup log entries of these files/folders will not appear in the backup logs.

Here are some examples:

```
/proc  
/dev  
/sys  
/run
```

## 2 Filter setup

### What are the configurations that need to be accomplished?

These are the fields that are available on the filtering module on AhsayCBS Web Console. Every field has its own functionality, and this will guide you to properly utilize the features of each control.

Fields	Description
<b>Filter Name</b>	Refers to the name of the filter of the backup set.
<b>Matching Pattern</b>	These matching pattern/s define the filtering rule.
<b>For each of the matched files/folders under top directory</b>	
<ul style="list-style-type: none"> <li><b>Include Them</b></li> </ul>	This will include all the directories, files, and folders that matches the specified pattern/s.
<ul style="list-style-type: none"> <li><b>Exclude Them</b></li> </ul>	This will exclude all the directories, files, and folders that do not match the specified pattern/s.
<b>Exclusion/Inclusion</b>	Condition in which you have the option to either exclude or include all the directories, files, and folders that do not match the specified pattern/s.
<b>Match file/folder names by</b>	Condition in which you have the option to either use the simple comparison that comes with these criteria: starts with, ends with, and contain, or the regular expression (UNIX style).
<ul style="list-style-type: none"> <li><b>Simple Comparison</b></li> </ul>	Starts With Directories, files, and folders with the name <u>starting</u> with a specific letter or word. Ends With Directories, files, and folders with the name <u>ending</u> with a specific letter or word. Contains Directories, files, and folders with the name <u>containing</u> the specific letter or word
<ul style="list-style-type: none"> <li><b>Regular expression (UNIX-style)</b></li> </ul>	Refers to a set of characters that specify a pattern. It is used when you want to search for specific lines of text containing a pattern.
<b>How to Apply This Filter</b>	Refers to the filtering rule on which directory the patterns would be applied, either on All hard disk drives or This folder only.
<ul style="list-style-type: none"> <li><b>All hard disk drives</b></li> </ul>	Apply the specified filtering pattern to all available hard disk drives.
<ul style="list-style-type: none"> <li><b>This folder only</b></li> </ul>	Apply the specified filtering pattern to a specific folder only.
<b>Apply to</b>	Apply the created pattern/s to all the files and/or folders. You have the option to select both checkboxes.

### 3 Comparison between Windows OS and Linux/FreeBSD OS

Below is the table comparison on using filtering on Windows OS and Linux / FreeBSD OS.

	Windows OS		Linux / FreeBSD OS		
	AhsayCBS	AhsayOBM	AhsayCBS	AhsayOBM	
				GUI	CLI
<b>Backup Set with Filter</b>	✓	✓	✓	✓	N/A
• <b>Simple Comparison</b>	✓	✓	✓	✓	N/A
• <b>Regular Expression (UNIX-Style)</b>	✓	✓	✓	✓	N/A
<b>Continuous Backup</b>	✓	✓	N/A		
<b>Predefined Destinations</b>	✓	✓	✓	✓	N/A
<b>Preview Feature</b>	✓	✓	N/A	✓	N/A

## 4 Managing filter for Windows OS

### 4.1 Create a backup set with filter

1. Go to **Backup Sets**.

2. Click the Add button.

3. Specify a backup set name and select the type. Click Next.

Create Backup Set

Name  
backup set name

Backup set type  
File Backup

Next Cancel Help

4. In the Filter part, slide the lever to the right to add a filter. Click the Add new filter button.

Filter

Apply filters to the backup source  
On

Existing filters  
+ Add new filter

5. Enter the name for your filter.

New Backup Filter

Name  
name of your filter

6. Choose whether the pattern you added will be included or excluded for the backup.
- If **Include them** is selected, you can check the box beside **Exclude all unmatched files/folders**.
  - If **Exclude them** is selected, you can check the box beside **Include all unmatched files/folders**.

**Note:** Please see [examples](#) to further understand how the filtering works.

The image shows two screenshots of a backup configuration interface. Both screenshots have the heading "For each of the matched files/folders under top directory".

The first screenshot shows the following options:

- Include them
- Exclude them
- Exclude all unmatched files/folders

The second screenshot shows the following options:

- Include them
- Exclude them
- Include all unmatched files/folders

7. Choose how the pattern will be compared, if it will be by **Simple comparison** or **Regular expression**. For Simple comparison you have 3 choices:
- **starts with**, files/folders that begins with the pattern will be selected
  - **contains**, files/folders that contains the pattern will be selected
  - **ends with**, files/folders that ends with the pattern will be selected

**Note:** The filter checks the whole filename including the filename extension. For example, you have a document with filename 'employees' so if **ends with s** is your filter then this file will not be included in the backup since its whole filename is 'employees.doc' or 'employees.docx' with both files not ending in **s** but **c** and **x** respectively.

The image shows a screenshot of the "Match file/folder names by" configuration options. It includes a radio button for "Simple comparison" (which is selected), a radio button for "Regular expression", and a dropdown menu with the following options: "ends with", "starts with", "contains", and "ends with". The "ends with" option is currently selected in the dropdown. Below the dropdown is a text input field with a checkered icon on the left.

8. Specify the pattern then click the Add button. For example the letter a. Repeat adding patterns, until all the patterns has been added to this filter.

**Note:** *The pattern is case sensitive only in Regular Expression.*

Existing patterns to match

a

9. Choose how the filter will be applied, whether in **All hard disk drives** or for **This folder only**. If for this folder only, specify the folder name.

Apply this filter to all files/folders in

All hard disk drives

This folder only

10. Select if the filter will be applied to **File**, **Folder** or both.

Apply to

File  Folder

11. Click the OK button to save the filter. Repeat Steps 4-10 until all the filters you want to apply are created. Click Next.

## Backup Source

Select the files and folders that you want to backup

Desktop

Documents

Favorites

Outlook

Windows Live Mail

### Filter

Apply filters to the backup source

On

16. You can either Unmask encryption key or Copy to clipboard the encryption key. Click Confirm to continue.

You are advised to write this encryption key down on paper and keep it in a safe place. You will need it when you need to restore your files later. Please confirm that you have done so.

●●●●●●

Unmask encryption key

Copy to clipboard Confirm

17. Click **Backup now** if you want to run the backup. Or you can click Close.

## 4.2 Edit existing backup set to add filter

1. Go to **Backup Sets**.

2. Select the backup set you want to add a filter.

3. Go to **Source** then slide the lever to the right under **Filter**. Click the Add new filter button.

4. Then follow Steps 5-10 on how to create the filter which was discussed in the previous section.

### 4.3 Check if filter is correct

You can check which files will be included in the backup before the actual backup occurs. To check if the filter is correct:

1. Go to your backup set then go to **Source**. Click **I would like to choose the files to backup**.

2. Click **Show files**, you can check here if the files that will be included in the backup is correct. Files that matches the filter criteria are greyed out.

**Note:** Only files not included in the filter may be added for backup. Once filter is applied to a file it cannot be changed. You will see a message like the one below if you try to check/uncheck a filtered file.

## 4.4 Filtering in Continuous Backup

Filtering in continuous backup is only supported by AhsayOBM on Windows Operating System. For continuous backup you can only specify filters that would exclude files from the backup. After turning on continuous backup, you must run a full backup first. This is to ensure that all the files are backed up. If you do not run a full backup first then only files that were changed or added will be backed up by AhsayOBM.

1. Choose the backup set that you want to set a continuous backup for.

2. Go to **Continuous Backup** and slide the lever to the right to turn it on.

3. Check the box if you do not want to backup files defined as system files which is enabled by default. Please refer to [Appendix D](#) for a list of system files that will be excluded from the backup. Set how often backup will run in minutes/hours. Also specify the size limit of the file that will be backed up.

## Continuous Backup

Backup whenever a change is made

On

## Exclude Filter

Existing Exclude Filters

Add new exclude filter

4. Click the + **Add new exclude filter** to specify the criteria for the filter.

## New Continuous Backup Exclude Filter

Name

Match file/folder names by  
 Simple comparison   
 Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in  
 All selected sources  
 This folder only

Apply to  
 File  Folder

- Enter the filter name.
- You can match the file/folder names either by **Simple comparison** or **Regular expression (UNIX-style)**. For simple comparison you can match it by **ends with**, **contains** or **starts with**.
- Enter the pattern that will be used for the filter. If there are more than one pattern, click the Add button to enter another pattern. Keep doing this until all the patterns are added.
- Specify the location of the files/folder whether in all selected sources or just a specific folder. By default **All selected sources** is selected.
- Choose whether to apply the filter to a **file**, **folder** or both.

## 5 Managing filter for Linux/ FreeBSD OS

### 5.1 Create a backup set with filter

1. Login to AhsayCBS Web Console using valid credentials.
2. On the main screen, under Backup / Restore, go to **User**.

3. Select **Backup Set** located on the left side of the screen then click the plus sign (+) to add a new backup set.

4. Enter the name of the new backup set and select the backup set type from the dropdown box then click the next icon located at the bottom right corner of the screen to continue.

### Create Backup Set

**General**

Name  
default-backup-set-name-1

Backup set type  
File Backup

- File Backup
- IBM Lotus Domino Backup
- IBM Lotus Notes Backup
- MS Exchange Server Backup
- MS Exchange Mail Level Backup
- MS SQL Server Backup
- MS Hyper-V Backup
- MS Windows System Backup
- MySQL Backup
- Oracle Database Server Backup
- ShadowProtect System Backup
- MS Windows System State Backup
- VMware Backup
- Cloud File Backup
- Office 365 Backup

5. Specify the backup source for the new backup set.

### Other Selected Source

Path

/root/Documents

6. Go to the Apply filters to the backup source. To apply a filter, by default it is not enabled. Slide the lever to the right side to enable it.

### Apply filters to the backup source

7. To add a filter to the backup set, click the **[+]** button. You can add as many as you want just make sure it won't conflict with the other backup sets that already has an existing filter configuration.

### Apply filters to the backup source

Name

8. Specify the filter name. Ensure that the filter name will correspond to the filter configuration you want to achieve so that .you won't be having a hard time amending the backup set from time to time.

## Filter

**Name**

9. To add pattern to your filter, click the **[+]** button. You can add various patterns that depends on your desired filter result.

### Matching pattern

Pattern

**Matching pattern**

<input type="checkbox"/>	Pattern 
<input type="checkbox"/>	A
<input type="checkbox"/>	b
<input type="checkbox"/>	.docx
<input type="checkbox"/>	Backup

These are some examples of matching patterns:

- Pattern No. 1: “**A**”
- Pattern No. 2: “**b**”
- Pattern No. 3: “**.docx**”
- Pattern No. 4: “**Backup**”

**Note:** The matching patterns above are just examples.

10. After specifying matching patterns, choose if the files/folders will be included or excluded in the backup.

**For each of the matched files/folders under top directory**

Include them

Exclude them

11. You also have the option to include or exclude all the unmatched files/folders by checking /unchecking the checkbox.

**Exclusion**

Exclude all unmatched files/folders

---

**Inclusion**

Include all unmatched files/folders

12. For the matching pattern specified above, select which comparison will be used. Either Simple Comparison that has three (3) options namely, Starts With, Ends With, and Contains or Regular Expression (UNIX-Style).

**Match file/folder names by**

Simple comparison

Regular expression (UNIX-style)

---

**Match file/folder names by**

Simple comparison

Regular expression (UNIX-style)

13. To apply this filter on a specific directory or folder, choose from the radio button, All hard disk drives or This folder only.

If **All hard disk drives** is selected, then the filter will be applied to all available hard disk drives in your computer.

If **This folder only** is selected, then the filter will only be applied to a specific directory.

Check or uncheck the File or Folder checkbox to apply the specified filter to all files and/or folders or you can check both of it. Click Next to proceed.

14. By default the Run scheduled backup for this backup set option is disabled. To create a backup schedule, slide the lever to the right to enable it.

15. To add a backup schedule, click the **[+]** button. Enter the information of the new backup schedule you want to add. Click the plus (+) sign at the bottom right corner of the screen to continue.

16. Add a new backup destination for this backup set.

Destination

Backup Mode

Sequential ▼

Concurrent

Sequential

+ -

Name

From the Backup Mode dropdown box, select either Sequential or Concurrent. In our example, we selected Sequential.

Add a Destination by your backup service provider by clicking (+) in the middle of the screen

Add Destination

Name

AhsayCBS

GoogleDrive-1

+ X ?

Select the destination and click the plus (+) sign at the bottom right corner of the screen to continue.

17. Uncheck the box to disable OpenDirect as this is not supported in Linux.

Add New Backup Set

**OpenDirect**

Support of opening backup data directly without restoration.

When OpenDirect is enabled, to optimize restore performance both compression and encryption will be disabled for this backup set.

Once OpenDirect is enabled and the setting is saved, it cannot be disabled without re-creating the backup set.

18. Leave the Domain Name / Host Name and User name fields blank since Windows User Authentication is not supported in Linux. Click Save to create the Backup Set.

### Add New Backup Set

#### Windows User Authentication

Domain Name (e.g. mycompany.com) / Host Name

User name

Password

Navigation icons: back, save, close, help

19. This is the newly created backup set.

User Profile

Effective Policy

#### Manage Backup Set ?

+ - ↶

<input type="checkbox"/>	Name	Type	Version	Owner	Execute Job
<input type="checkbox"/>	default-backup-set-name-1		--	--	--

## 5.2 Edit an existing backup set to add filter

1. Login using a valid credentials.
2. On the main screen, under Backup / Restore, go to **User**.

3. Click the **Backup Set** located on the left side of the screen.
4. Select and manage one of the created backup sets by double clicking the desired item.

A screenshot of a web application interface. On the left is a sidebar menu with items: User Profile, Backup Set (highlighted), Settings, Report, Statistics, and Effective Policy. The main content area is titled "Manage Backup Set" and contains three icons (add, delete, refresh) and a table. The table has columns: Name, Type, Version, Owner, and Execute Job. There is one row with a checkbox, the name "default-backup-set-name-1", a file icon in the Type column, and dashes in the Version, Owner, and Execute Job columns.

<input type="checkbox"/>	Name	Type	Version	Owner	Execute Job
<input type="checkbox"/>	default-backup-set-name-1		--	--	--

5. Follow steps 6 to 13 which are discussed in [Ch 5.1 Create a backup set with filter](#), pages 21 to 23.

### 5.3 Verify the backup report and logs

There are two (2) ways to check the report. First, by checking the report file on the AhsayCBS Web Console and the second way is via Command Line Interface (CLI).

---

Backup Report via Web Console	Access the report via the web console by going to <b>Backup/Restore&gt; User&gt; Report</b> . Select the report that you wanted to check and download the PDF. Note that the PDF will only be available 15 minutes after the completion of backup.
Backup Logs via Command Line Interface (CLI)	Access the log file via the CLI by going to this directory, <b>#cd /root/.obm/log</b> . The logs in the .obm directory is where all the backup logs are located. Select the backup report you wanted to check. Unlike in the AhsayCBS Web Console, the log files are available right after the completion of backup.

---

For additional reference on the location of the application logs, access the link below:

FAQ: Where are the backup client application logs stored at?

```

- b. Another scenario is still the same with the one above but this time the **Exclude all unmatched files/folders** box is checked.

### Backup Filter

Name  
contains a

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison contains  
 Regular expression (UNIX-style)

Existing patterns to match

A

Add

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

E:\document Change

Apply to

File  Folder

The result is:

### Advanced Backup Source

Folders	Name
This PC	<input checked="" type="checkbox"/> example.txt
Floppy Disk Drive (A:)	<input checked="" type="checkbox"/> filteringsample.xls
Local Disk (C:)	<input checked="" type="checkbox"/> filteringsample2.xls
DVD Drive (D:) CCCOM	<input checked="" type="checkbox"/> map_of_the_philippines.png
Temp1 (E:)	<input checked="" type="checkbox"/> samplemap.jpg
document	<input type="checkbox"/> Test01.doc
Temp2 (F:)	<input type="checkbox"/> Test02.doc
Network	<input type="checkbox"/> Test02s.doc

Explanation: All the files that contains the letter a will be included in the backup and the rest will be excluded since the option to exclude all unmatched files was checked. Since all the files match the filter criteria, that's why they are greyed out.

## Backup Report:

2. Filter all files that ends with the letter s.
  - a. **Exclude them** from the backup with **Include all unmatched files/folders** checked.

### Backup Filter

Name

For each of the matched files/folders under top directory

Include them  
 Exclude them

Include all unmatched files/folders

Match file/folder names by

Simple comparison  ▼  
 Regular expression (UNIX-style)

Existing patterns to match

■

✕

**Add**

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

Change

Apply to

File  Folder

The result is:

### Advanced Backup Source

Folders	Name
<ul style="list-style-type: none"> <li>[-] This PC</li> <li>[-] Floppy Disk Drive (A:)</li> <li>[-] Local Disk (C:)</li> <li>[-] DVD Drive (D:) CCCOM</li> <li>[-] Temp1 (E:)               <ul style="list-style-type: none"> <li>[-] document</li> </ul> </li> <li>[-] Temp2 (F:)</li> <li>[-] Network</li> </ul>	<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> example.txt</li> <li><input type="checkbox"/> filteringsample.xls</li> <li><input type="checkbox"/> filteringsample2.xls</li> <li><input checked="" type="checkbox"/> map_of_the_philippines.png</li> <li><input checked="" type="checkbox"/> samplemap.jpg</li> <li><input checked="" type="checkbox"/> Test01.doc</li> <li><input checked="" type="checkbox"/> Test02.doc</li> <li><input checked="" type="checkbox"/> Test02s.doc</li> </ul>

Explanation: All the files that does not end with the letter s will be included in the backup. Also the filter will be based on the last letter of the whole file which includes the filename extension, that is why only the xls files are excluded from the backup. And the map\_of\_philippines is included since it is a jpg file so the last letter of the file is the letter g.

- b. Another scenario is still the same as the one above, but this time the **Include all unmatched files/folders** is left unchecked.

### Backup Filter

Name

For each of the matched files/folders under top directory  
 Include them  
 Exclude them

Include all unmatched files/folders

Match file/folder names by  
 Simple comparison    
 Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in  
 All hard disk drives  
 This folder only

Apply to  
 File  Folder

The result is:

Explanation: No file will be included in the backup since the filter does not say to include all unmatched files/folders. As you can see from the screenshot above, only the xls files were filtered since it matches the criteria of the filter.

3. Filter all files **starting with the letter b**
  - a. **Include them** in the backup but with **Exclude all unmatched files/folders** unchecked.

### Backup Filter

Name

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison   
 Regular expression (UNIX-style)

Existing patterns to match

X

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

Change

Apply to

File  Folder

The result is:

### Advanced Backup Source

Folders	Name
<input type="checkbox"/> This PC	<input type="checkbox"/> example.txt
<input type="checkbox"/> Floppy Disk Drive (A:)	<input type="checkbox"/> filteringsample.xls
<input type="checkbox"/> Local Disk (C:)	<input type="checkbox"/> filteringsample2.xls
<input type="checkbox"/> DVD Drive (D:) CCCOM	<input checked="" type="checkbox"/> map_of_the_philippines.png
<input type="checkbox"/> Temp1 (E:)	<input type="checkbox"/> samplemap.jpg
<input type="checkbox"/> document	<input type="checkbox"/> Test01.doc
<input type="checkbox"/> Temp2 (F:)	<input type="checkbox"/> Test02.doc
<input type="checkbox"/> Network	<input type="checkbox"/> Test02s.doc

Explanation: Since no files starts with the letter b so there won't be any files included for backup.

## Backup Report:

- b. Another scenario is to **Exclude them** from the backup and with **Include all unmatched files/folders** checked.

**Backup Filter**

Name

For each of the matched files/folders under top directory  
 Include them  
 Exclude them

Include all unmatched files/folders

Match file/folder names by  
 Simple comparison    
 Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in  
 All hard disk drives  
 This folder only

Apply to  
 File  Folder

The result is:

**Advanced Backup Source**

Folders	Name
<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> This PC</li> <li><input type="checkbox"/> Floppy Disk Drive (A:)</li> <li><input type="checkbox"/> Local Disk (C:)</li> <li><input type="checkbox"/> DVD Drive (D:) CCCOM</li> <li><input type="checkbox"/> Temp1 (E:) <ul style="list-style-type: none"> <li><input type="checkbox"/> document</li> </ul> </li> <li><input type="checkbox"/> Temp2 (F:)</li> <li><input type="checkbox"/> Network</li> </ul>	<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> example.txt</li> <li><input checked="" type="checkbox"/> filteringsample.xls</li> <li><input checked="" type="checkbox"/> filteringsample2.xls</li> <li><input checked="" type="checkbox"/> map_of_the_philippines.png</li> <li><input checked="" type="checkbox"/> samplemap.jpg</li> <li><input checked="" type="checkbox"/> Test01.doc</li> <li><input checked="" type="checkbox"/> Test02.doc</li> <li><input checked="" type="checkbox"/> Test02s.doc</li> </ul>

Explanation: All the files that does not start with the letter b will be included in the backup since one of the criteria in the filter is to include all unmatched files/folders.

4. Filter files that **starts and ends with the letter t**

- a. **Include** all files that starts and ends with the letter t with **Exclude unmatched files/folders** left unchecked.

Existing filters

- ends t  
E:\document
- starts t  
E:\document

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison ends with ▼  
 Regular expression (UNIX-style)

Existing patterns to match

t

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison starts with ▼  
 Regular expression (UNIX-style)

Existing patterns to match

t

The result is:

Folders	Name
This PC	<input checked="" type="checkbox"/> example.txt
OS (C:)	<input type="checkbox"/> filteringsample.xls
Apps	<input type="checkbox"/> filteringsample02.xls
Brother	<input type="checkbox"/> map_of_philippines.JPG
Dell	<input type="checkbox"/> samplemap.JPG
document	<input checked="" type="checkbox"/> Test01.txt
Drivers	<input checked="" type="checkbox"/> Test02.txt
Intel	<input checked="" type="checkbox"/> Test02s.txt

Explanation: Only the files that starts or ends with the letter t will be included in the backup. As you can see in the screenshot the greyed out files will be included since they are txt files.

## Backup Report:

X

The result is:

Advanced Backup Source	
Folders	Name
[-] This PC	<input type="checkbox"/> example.txt
[-] Floppy Disk Drive (A:)	<input type="checkbox"/> filteringsample.xls
[-] Local Disk (C:)	<input type="checkbox"/> filteringsample2.xls
[-] DVD Drive (D:) CCCOM	<input type="checkbox"/> map_of_the_philippines.png
[-] Temp1 (E:)	<input type="checkbox"/> samplemap.jpg
[-] document	<input checked="" type="checkbox"/> Test01.txt
[-] Temp2 (F:)	<input checked="" type="checkbox"/> Test02.txt
[-] Network	<input checked="" type="checkbox"/> Test02s.txt

Explanation: Only files that starts and ends with the letter t will be included in the backup. That's why only the 3 Test files will be included in the backup since all three of them starts with the letter t and also ends with the letter t since they are txt files. While the file example is now excluded since it only ends with the letter t since it is a txt file but it does not start with the letter t.

- d. Another scenario is to **exclude** files that starts and ends with the letter t with **Include all unmatched files/folders** checked.

starts t  
E:\document

ends t  
E:\document

For each of the matched files/folders under top directory

Include them

Exclude them

Include all unmatched files/folders

Match file/folder names by

Simple comparison  ▼

Regular expression (UNIX-style)

Existing patterns to match

X

For each of the matched files/folders under top directory

Include them

Exclude them

Include all unmatched files/folders

Match file/folder names by

Simple comparison  ▼

Regular expression (UNIX-style)

Existing patterns to match

X

The result is:

Advanced Backup Source	
Folders	Name
<ul style="list-style-type: none"> <li>[-] This PC           <ul style="list-style-type: none"> <li>[-] Floppy Disk Drive (A:)</li> <li>[-] Local Disk (C:)</li> <li>[-] DVD Drive (D:) CCCON</li> <li>[-] Temp1 (E:)               <ul style="list-style-type: none"> <li>[-] document</li> </ul> </li> <li>[-] Temp2 (F:)</li> </ul> </li> <li>[-] Network</li> </ul>	<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> example.txt</li> <li><input checked="" type="checkbox"/> filteringsample.xls</li> <li><input checked="" type="checkbox"/> filteringsample2.xls</li> <li><input checked="" type="checkbox"/> map_of_the_philippines.png</li> <li><input checked="" type="checkbox"/> samplemap.jpg</li> <li><input type="checkbox"/> Test01.txt</li> <li><input type="checkbox"/> Test02.txt</li> <li><input type="checkbox"/> Test02s.txt</li> </ul>

Explanation: Only files that does not match the filter will be included in the backup. Since the **Include all unmatched files/folders** is checked so files that does not start and end with the letter t will be included in the backup. The filename should start and end with the letter t for it to be excluded.

## Backup Report:

Field	Value

--	--

Explanation:

All the files that contains the word Backup, whether it is located at the beginning, middle, or end of the file name, have been successfully backed up including the directories but excluding all the other files that did not match the filter.

This filter only applies to a specific folder which is Documents, and since the File, under the “Apply to” field, has been set to true, only the files have been backed up even if there are available folders that matched the set criteria.

Here are the reports using the AhsayCBS web console and CLI:

### Backup Report from AhsayCBS Web Console

Backup Set Settings	
Field	Value
Backup Source	
Filter	[Enabled: true][Name: Filter that contains the word Backup, Type: contain. Top Directory: /root/Documents, Include: Yes, Exclude all unmatched files/folders: Yes, Apply to: No, Apply to files: Yes, Pattern: [Backup]]
Backup Schedule	[Computer Name: ][Daily: ][Weekly: ][Monthly: ][Custom: ]
Continuous Data Protection	[Enabled: No]
In-File Delta	[Enabled: Yes, Default Type: D, Block Size: -1, Minimum Size = 26214400, Maximum No. of Delta = 100, Delta Ratio = 50, Weekly: [], Monthly: [, Day: 0, Criteria: Friday, Day of selected months in yearly variations: First]
Retention Policy	[Type: Simple, Period: 7, Unit: Day(s)]
Command Line Tool	
Reminder	Logout Backup Reminder: , Off-line Backup Reminder: , Off-line Notification Day: 1 Days 0 hours
Bandwidth Control	[Enabled: No, Mode: Share, Bandwidth Control: ]
Others	Remove temporary files after backup: Yes, Follow Link: Yes, Volume Shadow Copy: Yes, File Permissions: No, Compression Type: Fast (Compressed size larger than normal)

---	---

**Explanation:**

All the files that ends with a lowercase letter x have been successfully backed up including the directories but excluding all the other files that do not match the filter. This only applies to a specific folder which is Documents, and since the File, *under the "Apply to" field*, has been set to true, only the files have been backed up even if there are available folders that matched the set criteria.

Take note also that the Ends With filter includes the extension file upon performing the filtering. For example, the file name **AhsayCloudFileBackupSolution\_v10.pptx**. Looking closely on the file name, it doesn't end with a lower-case letter x but since it is a PowerPoint presentation which has an extension file of **pptx**, it was automatically accepted and included in the backup.

Here are the reports using the AhsayCBS web console and CLI:

### Backup Report from AhsayCBS Web Console

Backup Set Settings	
Field	Value
Backup Source	
Filter	[Enabled: true][Name: Filter that ends with lower-case letter x, Type: ends with, Top Directory: /root/Documents, Include: Yes, Exclude all unmatch ed files/folders: Yes, Apply to: No, Apply to files: Yes, Pattern: [x]]
Backup Schedule	[Computer Name: ][Daily: ][Weekly: ][Monthly: ][Custom: ]
Continuous Data Protection	[Enabled: No]
In-File Delta	[Enabled: Yes, Default Type: D, Block Size: -1, Minimum Size = 26214400, Maximum No. of Delta = 100, Delta Ratio = 50, Weekly: [], Monthly: [], Da y: 0, Criteria: Friday, Day of selected months in yearly variations: First]
Retention Policy	[Type: Simple, Period: 7, Unit: Day(s)]
Command Line Tool	
Reminder	Logout Backup Reminder: , Off-line Backup Reminder: , Off-line Notification Day: 1 Days 0 hours
Bandwidth Control	[Enabled: No, Mode: Share, Bandwidth Control: ]
Others	Remove temporary files after backup: Yes, Follow Link: Yes, Volume Shadow Copy: Yes, File Permissions: No, Compression Type: Fast (Compressed siz e larger than normal)

# Appendix B Examples using Regular Expression (UNIX-style)

## Appendix B.1 Windows OS

1. Include everything **except the Photo folder**

The result is:

Explanation: Since the filter excluded the Photo folder, all the files inside it will not be included in the backup. While everything else will be included since the **Include all unmatched files/folders** box is checked.

## Backup Log:

Field	Value
Backup Source	[E:\]
Filter	[Enabled: true][Name: everything except Photo, Type: Custom, Top Directory: E\, Include: No, Exclude all unmatched files/folders: Yes, Apply to Yes, Apply to files: No, Pattern: [*Photo\$]]
Backup Schedule	[Computer Name: ][Daily: ][Weekly: ][Monthly: ][Custom: ]
Continuous Data Protection	[Enabled: No]
In-File Delta	[Enabled: Yes, Default Type: D, Block Size: -1, Minimum Size = 26214400, Maximum No. of Delta = 100, Delta Ratio = 50, Weekly: [], Monthly: [], Daily: 0, Criteria: Friday, Day of selected months in yearly variations: First]
Retention Policy	[Type: Simple, Period: 7, Unit: Days]
Command Line Tool	
Reminder	Logout Backup Reminders: Off-line Backup Reminders: Off-line Notification Day: 1 Days 0 hours
Bandwidth Control	[Enabled: No, Mode: Independent, Bandwidth Control: ]
Others	Remove temporary files after backup: Yes, Follow Link: Yes, Volume Shadow Copy: No, File Permissions: Yes, Compression Type:

2. Filter **excel files** that **starts with lower case letter a**

**Existing filters**

 excel files that starts with a  
E:\

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison ends with ▼  
 Regular expression (UNIX-style)

Existing patterns to match

 ^a.\*\.xls\$

The result is:

Advanced Backup Source

Explanation: Only excel files that start with lower case letter a will be included in the backup. As you can see only files that start with lower case letter a will be backed up because the filter for regular expressions are case sensitive. So, the files starting with upper case letter A will not be included.

3. Filter files that **contains the word cloud**

Existing filters

 **contains cloud**  
E:\

---

For each of the matched files/folders under top directory

Include them

Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison ends with ▼

Regular expression (UNIX-style)

Existing patterns to match

  X

The result is:

### Advanced Backup Source

Folders	Name	Folders	Name
<ul style="list-style-type: none"> <li>[-] This PC                             <ul style="list-style-type: none"> <li>[-] Floppy Disk Drive (A:)</li> <li>[-] Local Disk (C:)</li> <li>[-] DVD Drive (D:) CCCON</li> <li>[-] Temp...</li> <li>[-] Ar...</li> <li>[-] Docu...                                     <ul style="list-style-type: none"> <li>[-] doc</li> <li>[-] pdf</li> <li>[-] text</li> </ul> </li> <li>[-] Excel</li> <li>[-] Photo</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> cloud_deployment_Azure.pdf</li> <li><input checked="" type="checkbox"/> cloud_deployment_Dropbox.pdf</li> <li><input checked="" type="checkbox"/> cloud_deployment_Google.pdf</li> <li><input checked="" type="checkbox"/> cloud_deployment_OneDrive.pdf</li> <li><input checked="" type="checkbox"/> cloud_deployment_OpenStack.pdf</li> </ul>	<ul style="list-style-type: none"> <li>[-] This PC                             <ul style="list-style-type: none"> <li>[-] Floppy Disk Drive (A:)</li> <li>[-] Local Disk (C:)</li> <li>[-] DVD Drive (D:) CCCON</li> <li>[-] Temp...</li> <li>[-] Ar...</li> <li>[-] Docu...                                     <ul style="list-style-type: none"> <li>[-] doc</li> <li>[-] pdf</li> <li>[-] text</li> </ul> </li> <li>[-] Excel</li> <li>[-] Photo</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> indexes_full_list.txt</li> <li><input checked="" type="checkbox"/> installation_final_cloud.txt</li> <li><input type="checkbox"/> installation_final_SAN.txt</li> <li><input type="checkbox"/> installation_network.txt</li> <li><input checked="" type="checkbox"/> installation_start_cloud.txt</li> </ul>

## Appendix B.2 Linux/ FreeBSD OS

### 1. Filter that starts with uppercase letter L.

<p><b>Filter</b></p> <p><b>Name</b></p> <input type="text" value="Filter that starts with uppercase letter L RegularExpres:"/> <hr/> <p><b>Matching pattern</b></p> <p>+ </p> <p><input type="checkbox"/> Pattern </p> <p><input type="checkbox"/> ^L.*</p> <hr/> <p><b>For each of the matched files/folders under top directory</b></p> <p><input checked="" type="radio"/> Include them <input type="radio"/> Exclude them</p> <hr/> <p><b>Exclusion</b></p> <p><input checked="" type="checkbox"/> Exclude all unmatched files/folders</p> <hr/> <p><b>Match file/folder names by</b></p> <p><input type="radio"/> Simple comparison <input type="text" value="starts with"/> <input type="button" value="v"/> <input checked="" type="radio"/> Regular expression (UNIX-style)</p> <hr/> <p><b>How to Apply This Filter</b></p> <p>Apply this filter to all files/folders in</p> <p><input type="radio"/> All hard disk drives <input checked="" type="radio"/> This folder only</p> <input type="text" value="/root/Documents_2"/> <hr/> <p>Apply to</p> <p><input checked="" type="checkbox"/> File <input type="checkbox"/> Folder</p>	<p>Filter Name = Filter that starts with uppercase letter L RegularExpression Matching Pattern = ^L.* Filter Mode = Include Them Exclude all others = True Matching Type = Regular expression (UNIX-style) Apply To = File Directory = /root/Documents_2</p> <hr/> <p>As a result, these are the total files and directories that have been successfully backed up:</p> <p>Total New Files = 3</p> <ol style="list-style-type: none"><li>1. <u>L</u>ogFile.txt</li><li>2. <u>L</u>ogFile_2017.txt</li><li>3. <u>L</u>ogFile_2018.txt</li></ol> <p>Total New Directories = 5</p> <ol style="list-style-type: none"><li>1. /</li><li>2. /root</li><li>3. /root/Documents_2</li><li>4. /usr</li><li>5. /usr/local</li></ol>
--	--

#### Explanation:

All the files that starts with uppercase letter L have been successfully backed up including the directories but excluding all the other files that did not match the filter.

Looking closely, unlike in the Appendix A using simple comparison, we're using the Regular expression (UNIX-style) with pattern ^L.\*. This filter only applies to a specific folder which is Documents\_2, and since the File, *under the "Apply to" field*, has been set to true, only the files have been backed up even if there are available folders that matched the set criteria.

Here are the reports using the AhsayCBS web console and CLI:

### Backup Report from AhsayCBS Web Console

Backup Set Settings	
Field	Value
Backup Source	
Filter	[Enabled: true][Name: Filter that starts with uppercase letter L Regular Expression, Type: Custom, Top Directory: /root/Documents_2, Include: Yes, Exclude all unmatched files/folders: Yes, Apply to: No, Apply to files: Yes, Pattern: [*L.*]]

---	---

Explanation:

All the files that contains the word version, whether it is located at the beginning, middle, or end of the file name, have been successfully backed up including the directories but excluding all the other files that did not match the filter.

Looking closely, unlike in the Appendix A using simple comparison, we're using the Regular expression (UNIX-style) with pattern ^.\***version**.\*\$. This filter only applies to a specific folder which is Documents\_2, and since the File, *under the "Apply to" field*, has been set to true, only the files have been backed up even if there are available folders that matched the set criteria.

Here are the reports using the AhsayCBS web console and CLI:

## Appendix C Filtering in network drives on Windows OS

1. Filter files that ends with f
  - a. Include them but with **Exclude all unmatched files/folders** left unchecked

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison ends with ▼  
 Regular expression (UNIX-style)

Existing patterns to match

X

Add

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

Change

The result is:

Explanation: Only files that end with the letter f will be included in the backup. As you can see in the screenshot the greyed out files will be included since they are pdf, gif and tiff files. Since the **Exclude all unmatched files/folders** was left unchecked all other files that does not end with the letter f will still not be included but it does not satisfy the filter criteria which is why it is not greyed out.

## Backup Report:

b. **Include them** but with **Exclude all unmatched files/folders** checked

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison  ▼  
 Regular expression (UNIX-style)

Existing patterns to match

X

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

The result is:

### Advanced Backup Source

Folders	Name
<ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> This PC</li> <li><input type="checkbox"/> Floppy Disk Drive (A:)</li> <li><input type="checkbox"/> Local Disk (C:)</li> <li><input type="checkbox"/> DVD Drive (D:) CCCOM</li> <li><input type="checkbox"/> Temp1 (E:)</li> <li><input type="checkbox"/> Temp2 (F:)</li> <li><input type="checkbox"/> share (\\10.16.10.12...</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Adding Temporary Folder in CBS.doc</li> <li><input type="checkbox"/> AliYun_cloud.PNG</li> <li><input checked="" type="checkbox"/> cloud_deployment_Google.pdf</li> <li><input checked="" type="checkbox"/> cloud_deployment_OneDrive.pdf</li> <li><input type="checkbox"/> Company Profile.doc</li> <li><input type="checkbox"/> CTYun_cloud.PNG</li> <li><input type="checkbox"/> Expense_2018_Mar.xls</li> <li><input type="checkbox"/> Google_cloud.PNG</li> <li><input type="checkbox"/> IMG_0449.jpg</li> <li><input type="checkbox"/> IMG_0449_0.png</li> <li><input checked="" type="checkbox"/> IMG_0449_01.gif</li> <li><input type="checkbox"/> IMG_0449_011.bmp</li> <li><input checked="" type="checkbox"/> IMG_0449_012.tiff</li> <li><input type="checkbox"/> IMG_0449_13.png</li> <li><input type="checkbox"/> Income_2018_Mar.xls</li> <li><input type="checkbox"/> OneDrive_cloud.PNG</li> </ul>

Explanation: Only files that end with the letter f will be included in the backup. Since the **Exclude all unmatched files/folders** was checked they will not be included in the backup but they are greyed out since they match the filter criteria.

c. **Exclude them with Include all unmatched files/folders** unchecked

For each of the matched files/folders under top directory

Include them

Exclude them

Include all unmatched files/folders

Match file/folder names by

Simple comparison ends with ▼

Regular expression (UNIX-style)

Existing patterns to match

f

Apply this filter to all files/folders in

All hard disk drives

This folder only

The result is:

Explanation: No files will be included in the backup since the criteria is to exclude all files that end with the letter f. Since the **Include all unmatched files/folders** was left unchecked the other files will also not be included in the backup.

2. Filter all files that **start with i**

a. **Include them with Exclude all unmatched files/folders checked**

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison    
 Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

The result is:

Explanation: All files that start with the letter i will be included in the backup. While the rest of the files will not be included in the backup but since they satisfy the filter criteria they are also greyed out.

b. **Include them with Exclude all unmatched files/folders** unchecked

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison starts with ▼  
 Regular expression (UNIX-style)

Existing patterns to match

i

Add

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

\\10.16.10.12\share\ Change

The result is:

Explanation: All the files that start with the letter i will be included in the backup. Since the Exclude all unmatched files/folders was not checked, all the other files does not match the criteria so they are not greyed out.

c. **Exclude them with Include all unmatched files/folders** unchecked

For each of the matched files/folders under top directory

Include them

Exclude them

Include all unmatched files/folders

Match file/folder names by

Simple comparison starts with ▼

Regular expression (UNIX-style)

Existing patterns to match

i

Apply this filter to all files/folders in

All hard disk drives

This folder only

The result is:

Explanation: All the files that start with letter i will not be included in the backup since the filter criteria is to exclude them. And since the **Include all unmatched files/folders** was left unchecked the rest of the files will also not be included in the backup and since it does not match the criteria it will not be greyed out.

## Backup Report:

Field	Value
Backup Source	
Filter	[Enabled: true][Name: Filter-1, Type: starts with, Top Directory: \\10.16.10.39\share\, Include: No, Exclude all unmatched files/folders: No, Apply to: No, Apply to Files: Yes, Pattern: {}]

3. Filter files that **contains 'cloud'**

a. **Include them with Exclude all unmatched files/folders** unchecked

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison   
 Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

The result is:

### Advanced Backup Source

b. **Include them with Exclude all unmatched files/folders** checked

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison   
 Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

The result is:

### Advanced Backup Source

Folders	Name
<ul style="list-style-type: none"> <li>[-] This PC           <ul style="list-style-type: none"> <li>[-] Floppy Disk Drive (A:)</li> <li>[-] Local Disk (C:)</li> <li>[-] DVD Drive (D:) CCCOM</li> <li>[-] Temp1 (E:)</li> <li>[-] Temp2 (F:)</li> <li>[-] share (\\10.16.10.12...)</li> </ul> </li> <li>[-] Libraries</li> <li>[-] Network</li> </ul>	<ul style="list-style-type: none"> <li><input type="checkbox"/> Adding Temporary Folder in CBS.doc</li> <li><input checked="" type="checkbox"/> AliYun_cloud.PNG</li> <li><input checked="" type="checkbox"/> cloud_deployment_Google.pdf</li> <li><input checked="" type="checkbox"/> cloud_deployment_OneDrive.pdf</li> <li><input type="checkbox"/> Company Profile.doc</li> <li><input checked="" type="checkbox"/> CTYun_cloud.PNG</li> <li><input type="checkbox"/> Expense_2018_Mar.xls</li> <li><input checked="" type="checkbox"/> Google_cloud.PNG</li> <li><input type="checkbox"/> IMG_0449.jpg</li> <li><input type="checkbox"/> IMG_0449_0.png</li> <li><input type="checkbox"/> IMG_0449_01.gif</li> <li><input type="checkbox"/> IMG_0449_011.bmp</li> <li><input type="checkbox"/> IMG_0449_012.tiff</li> <li><input type="checkbox"/> IMG_0449_13.png</li> <li><input type="checkbox"/> Income_2018_Mar.xls</li> <li><input checked="" type="checkbox"/> OneDrive_cloud.PNG</li> </ul>

Explanation: All files that contain the word cloud will be included in the backup. Since the **Exclude all unmatched files/folders** was checked, the rest of the files will not be included in the backup but they will be greyed out since they match the filter criteria.

c. **Exclude them with Include all unmatched files/folders** unchecked

For each of the matched files/folders under top directory

Include them

Exclude them

Include all unmatched files/folders

Match file/folder names by

Simple comparison

Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in

All hard disk drives

This folder only

The result is:

Explanation: All the files that contain the word cloud will not be included in the backup. Since the **Include all unmatched files/folders** is left unchecked, the rest of the files will also not be included in the backup and they will not be greyed out since they do not match the criteria.

4. Filter all expense files for 2018. You need to create two filters to get the desired result. First create a filter that will exclude the year 2017.

For each of the matched files/folders under top directory

Include them

Exclude them

Include all unmatched files/folders

Match file/folder names by

Simple comparison

Regular expression (UNIX-style)

Existing patterns to match

Apply this filter to all files/folders in

All hard disk drives

This folder only

Then create a filter that will include the pattern expense but exclude everything else.

For each of the matched files/folders under top directory

Include them  
 Exclude them

Exclude all unmatched files/folders

Match file/folder names by

Simple comparison   
 Regular expression (UNIX-style)

Existing patterns to match

expense

Apply this filter to all files/folders in

All hard disk drives  
 This folder only

The result is:

### Advanced Backup Source

Folders	Name
[-] This PC	<input type="checkbox"/> asset_inventory_2016.xls
[-] Floppy Disk Drive (A:)	<input type="checkbox"/> asset_inventory_2017.xls
[-] Local Disk (C:)	<input type="checkbox"/> asset_inventory_2018.xls
[-] DVD Drive (D:) CCCOM	<input type="checkbox"/> Expense_2017_Feb.xls
[-] Temp1 (E:)	<input type="checkbox"/> Expense_2017_Jan.xls
[-] Temp2 (F:)	<input type="checkbox"/> Expense_2017_Mar.xls
[-] shared (\\10.16.10.12)	<input checked="" type="checkbox"/> Expense_2018_Feb.xls
[-] share (\\10.16.10.12) (	<input checked="" type="checkbox"/> Expense_2018_Jan.xls
[-] Libraries	<input checked="" type="checkbox"/> Expense_2018_Mar.xls
[-] Network	<input type="checkbox"/> Income_2017_Feb.xls
	<input type="checkbox"/> Income_2017_Jan.xls
	<input type="checkbox"/> Income_2017_Mar.xls
	<input type="checkbox"/> Income_2018_Feb.xls
	<input type="checkbox"/> Income_2018_Jan.xls
	<input type="checkbox"/> Income_2018_Mar.xls

**Note:** If you are using a network drive do not choose to apply the filter in all hard disk drives because filtering will take a long time and it might not stop.

Explanation: Only expense files for 2018 will be included in the backup.

## Backup Report:

## Appendix D Filtering in Windows shared folder on Linux/FreeBSD OS

1. Filter that starts with uppercase letter C on a windows shared folder.

<p><b>Filter</b></p> <p><b>Name</b></p> <input type="text" value="Filter that starts with uppercase letter C"/> <p><b>Matching pattern</b></p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p> <p><input type="checkbox"/> Pattern <input type="checkbox"/></p> <p><input type="checkbox"/> C</p> <p><b>For each of the matched files/folders under top directory</b></p> <p><input checked="" type="radio"/> Include them <input type="radio"/> Exclude them</p> <p><b>Exclusion</b></p> <p><input checked="" type="checkbox"/> Exclude all unmatched files/folders</p> <p><b>Match file/folder names by</b></p> <p><input checked="" type="radio"/> Simple comparison <input type="text" value="starts with"/> <input type="text"/></p> <p><input type="radio"/> Regular expression (UNIX-style)</p> <p><b>How to Apply This Filter</b></p> <p>Apply this filter to all files/folders in</p> <p><input type="radio"/> All hard disk drives <input checked="" type="radio"/> This folder only</p> <p><input type="text" value="/mnt"/></p> <p>Apply to</p> <p><input checked="" type="checkbox"/> File <input type="checkbox"/> Folder</p>	<p>Filter Name = Filter that starts with uppercase letter C          Matching Pattern = C          Filter Mode = Include Them          Exclude all others = True          Matching Type = Simple Comparison   Starts With          Apply To = File          Directory = /mnt/backupfiles</p> <p>As a result, these are the total files and directories that have been successfully backed up:</p> <p>Total New Files = 6</p> <ol style="list-style-type: none"> <li>1. <u>C</u>loudBackup_001.txt</li> <li>2. <u>C</u>loudBackup_002.txt</li> <li>3. <u>C</u>loudBackup_003.txt</li> <li>4. <u>C</u>onfiguration_Guide2016.docx</li> <li>5. <u>C</u>onfiguration_Guide2017.docx</li> <li>6. <u>C</u>onfiguration_Guide2018.docx</li> </ol> <p>Total New Directories = 5</p> <ol style="list-style-type: none"> <li>1. /</li> <li>2. /mnt</li> <li>3. /root</li> <li>4. /usr</li> <li>5. /usr/local</li> </ol>
---	---

### Explanation:

All the files that starts with uppercase letter C have been successfully backed up including the directories but excluding all the other files that did not match the filter. This example is the same as the one on the simple comparison – starts with filter, the only difference is that the source destination is a Windows shared folder.

This filter only applies to a specific folder which is mnt, and since the File, *under the “Apply to” field*, has been set to true, only the files have been backed up even if there are available folders that matched the set criteria.

Here are the reports using the AhsayCBS web console and CLI:

### Backup Report from AhsayCBS Web Console

2. Filter that contains the word Backup on a Windows shared folder.

<h3>Filter</h3> <p><b>Name</b></p> <input type="text" value="Filter that contains the word Backup Regular Expression"/> <hr/> <p><b>Matching pattern</b></p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p> <p><input type="checkbox"/> <b>Pattern</b> <input type="checkbox"/></p> <p><input type="checkbox"/> <code>^.*Backup.*\$</code></p> <hr/> <p><b>For each of the matched files/folders under top directory</b></p> <p><input checked="" type="radio"/> Include them <input type="radio"/> Exclude them</p> <hr/> <p><b>Exclusion</b></p> <p><input checked="" type="checkbox"/> Exclude all unmatched files/folders</p> <hr/> <p><b>Match file/folder names by</b></p> <p><input type="radio"/> Simple comparison <input type="text" value="starts with"/></p> <p><input checked="" type="radio"/> Regular expression (UNIX-style)</p> <hr/> <p><b>How to Apply This Filter</b></p> <p>Apply this filter to all files/folders in</p> <p><input type="radio"/> All hard disk drives <input checked="" type="radio"/> This folder only</p> <p><input type="text" value="/mnt"/></p> <p>Apply to</p> <p><input checked="" type="checkbox"/> File <input type="checkbox"/> Folder</p>	<p>Filter Name = Filter that contains the word Backup Regular Expression Matching Pattern = <code>^.*Backup.*\$</code> Filter Mode = Include Them Exclude all others = True Matching Type = Simple Comparison   Starts With Apply To = File Directory = /mnt/backupfiles</p> <hr/> <p>As a result, these are the total files and directories that have been successfully backed up:</p> <p>Total New Files = 3</p> <ol style="list-style-type: none"><li>1. CloudBackup_001.txt</li><li>2. CloudBackup_002.txt</li><li>3. CloudBackup_003.txt</li></ol> <p>Total New Directories = 5</p> <ol style="list-style-type: none"><li>1. /</li><li>2. /mnt</li><li>3. /root</li><li>4. /usr</li><li>5. /usr/local</li></ol>
--	--

Explanation:

All the files that contains the word version, whether it is located at the beginning, middle, or end of the file name, have been successfully backed up including the directories but excluding all the other files that did not match the filter.

Looking closely, unlike in the Appendix A using simple comparison, we're using the Regular expression (UNIX-style) with pattern `^.*Backup.*$`. This filter only applies to a specific folder which is mnt, and since the File, *under the "Apply to" field*, has been set to true, only the files have been backed up even if there are available folders that matched the set criteria.

This example is the same as the one on the regular expression – contains filter, the only difference is that the source destination is a Windows shared folder.

Here are the reports using the AhsayCBS web console and CLI:

### Backup Report from AhsayCBS Web Console

Backup Set Settings	
Field	Value
Backup Source	
Filter	[Enabled: true][Name: Filter that contains the word Backup Regular Expression, Type: Custom, Top Directory: /mnt, Include: Yes, Exclude all unmatched files/folders: Yes, Apply to: No, Apply to files: Yes, Pattern: [.*Backup.*\$]]
Backup Schedule	[Computer Name: ][Daily: ][Weekly: ][Monthly: ][Custom: ]
Continuous Data Protection	[Enabled: No]
In-File Delta	[Enabled: Yes, Default Type: D, Block Size: -1, Minimum Size = 2621400, Maximum No. of Delta = 100, Delta Ratio = 50, Weekly: [], Monthly: [, Day: 0, Criteria: Friday, Day of selected months in yearly variations: First]
Retention Policy	[Type: Simple, Period: 7, Unit: Day(s)]
Command Line Tool	
Reminder	Logout Backup Reminder: , Off-line Backup Reminder: , Off-line Notification Day: 1 Days 0 hours
Bandwidth Control	[Enabled: No, Mode: Share, Bandwidth Control: ]
Others	Remove temporary files after backup: Yes, Follow Link: Yes, Volume Shadow Copy: Yes, File Permissions: No, Compression Type: Fast (Compressed size larger than normal)

## Appendix E System Files for Continuous Backup Exclusion on Windows OS

Below is a list of system files you chose to exclude from the continuous backup:

- C:\Program Files
- C:\Windows
- Pagefile.sys
- hiberfil.sys
- \*.tmp
- \*.part
- System Volume Information
- \$Recycle.Bin (Vista, 2008/R2, Win7)
- RECYCLER (2000, XP, 2003)
- RECYCLED
- C:\Documents and Settings\All Users\Application Data\Microsoft, C:\ProgramData\Microsoft
- C:\Documents and Settings\All Users\Application Data\Kaspersky Lab
- C:\Documents and Settings\All Users\Application Data\Symantec
- C:\Documents and Settings\All Users\Application Data\Avg7
- C:\Documents and Settings\All Users\Application Data\Avg8
- C:\Documents and Settings\All Users\Application Data\McAfee
- C:\Documents and Settings\All Users\Application Data\McAfee.com
- C:\Documents and Settings\All Users\Application Data\Sophos
- ntuser.dat ntuser.dat.log
- \*AppData\Local\Microsoft\\*
- \*AppData\Local\Temp\\*
- \*AppData\Roaming Data\Microsoft\\*
- \*Local Settings\Application Data\Microsoft\\*
- \*Local Settings\Temporary Internet Files
- \*Local Settings\Temp
- \*Local Settings\History
- \*LOCALS~1\Temp
- \*LOCALS~1\Tempor~1
- \*LOCALS~1\History
- ~\$\*.doc
- ~\$\*.ppt
- ~\$\*.xls
- ~\$\*.dot
